

Title : Canine Christmas

This card started with this goofy little door stamp. I colored the door and then the ideas started flowing. I extended the door stamp to a full door to add the mistletoe bone stamp to it. I originally was going to put the poodle inside the card but then came up with the dog prints from MFT and decided the dog had to be on the front. The Christmas tree that I had was an SU die cut and too small so I just layered them on top of each other and added snow. (RHH you do need to make a bigger Christmas tree.) MFT made a die cut with "merry" so that was added to the front.
